ACOUSTIC ART TEXTILES

WHERE ART MEETS FUNCTION

Made for public spaces, hotels, restaurants, offices, cruise ships.

Patented textile boards are visually captivating and also provide significant acoustic benefits to various spaces. They soften the acoustics of a space, reduce echoes, and create a pleasant sound environment. Whether it's a living room, office space, or a public area, these textiles bring both visual beauty and a sense of balance to the auditory environment. Each piece is unique.

Custom orders for textiles are available to meet your specific needs. They can be crafted in your desired size and color, making our products suitable for private residences and demanding public spaces. The textiles are designed to fulfill various requirements and are well-suited for projects of all sizes. Made in Finland. Made to order. 50 color options. Colors can be combined to create a pattern resembling natural shapes or a company logo, or use brand colors.
